PROVEN BENEFITS

www.pacificmindhealth.com

OF TMS THERAPY

NON-INVASIVE TREATMENT

TMS is a non-invasive treatment that administers electromagnetic pulses without any sedation or anesthesia in the comfort of our outpatient setting.

FDA CLEARED

TMS is cleared by the FDA for use in treating Major Depressive Disorder when medications treatments fail or produce unwanted side effects.

INSURANCE COVERED

Major health insurers cover TMS therapy. Our expert team can evaluate your insurance coverage and help gain approval.

MINIMAL SIDE EFFECTS

With antidepressants, there are side-effects such as weight gain, decreased libido, nausea, and constipation. TMS helps the brain function in a more natural way without the common medication side effects.*

HIGH SUCCESS RATES

The effectiveness of TMS from the world's largest randomized controlled trial, known as the THREE-D trial, involved 414 patients suffering from major depressive disorder. Remission rates were 32% for those receiving the TBS protocol, whereas 49% responded to the treatment. These response rates are similar to the standard, longer TMS protocol. The results were published in The Lancet in 2018.

FEEL LIKE YOURSELF AGAIN!

Express TMS®: TMS treatment in just 3 minutes

If you or a loved one suffers from a mental health condition, then you understand how it can affect your mood, thinking and behavior every day. Untreated mental illnesses can cause frequent stress and affect your overall health and happiness in life. At Pacific Mind Health, we're committed to helping patients in our community find renewed hope and health through restorative state-of-the-art treatments.

Whether it's through medication, Psychotherapy, TMS Therapy, or Ketamine Therapy, our team is dedicated to treating each individual with compassion while focusing on patient safety, comfort, and wellness.

We use Magventure Express TMS® technology - the only company to offer FDA cleared 3 minute TMS sessions

This faster TMS treatment is just as safe and effective for the treatment of major depressive disorder as standard TMS, only much faster.
